Define CS Explore AS, differentiate AS 1. CUSTOMER SEGMENT(S) CC 6. CUSTOMER CONSTRAINTS 5. AVAILABLE SOLUTIONS CS Hospitals The customers can prefer over a manual data The unawareness over the AI/ML technologies, Clinics visualization and prediction, which is very collaborative dashboards, network connection, WHO tedious job and requires the knowledge over lack of data. fit into CC Any medical related agencies those the technologies of AI/ML. prepare medicines or any kind of solutions inferring over the data of Hard mathematical formulae were created diseases. and the results were being calculated manually. 7. BEHAVIOUR 2. JOBS-TO-BE-DONE / PROBLEMS J&P 9. PROBLEM ROOT CAUSE RC Quality of Data: Difficulty of predicting a heart Generation of legitimate and reliable The quality of data should be accurate disease. datasets and reliable. Obviously, the outcome will Will not have a proper idea of relation Customers need to collect more number solely depend on the data we put into between similar heart diseases. of datasets in order to obtain more the prediction. If the data is skewed, There is a chance of identifying every accurate result. then the prediction which is dependent heart diseases as same. Must obtain knowledge of difference on it, will be skewed as well. Reason of increase in heart disease between datasets that is used for will not be rootly identified. comparison.

| 4. EMOTIONS: BEFORE / AFTER | |
|--|------------|
| Before -> It creates a huge ambiguity in knowir proper or accurate reasons for a heart disease | |
| After -> There is a large chance understanding heart disease and root cause of it. which makes a better solution and finding a preway over it. | 59-50-00-0 |
